

Offshore Treatment Provider

China (Excluding Hong Kong)

As at 5 September 2018

All certificates from treatment providers in China must be endorsed by the General Administration of Customs of the People's Republic of China (GACC). This endorsement is evidenced by the GACC logo in the top left corner of the certificate. The certificate must also bear the stamp of the issuing branch. If treatment certificates from China are not endorsed with the GACC logo they will not be accepted by the department.

The Department of Agriculture and Water Resources does not accept treatment certificates issued by the private treatment providers located in Hong Kong for treatments performed in China. Certificates issued by private treatment providers for treatments performed in China are also unacceptable. All consignments treated by companies listed as “unacceptable” will be treated on arrival, exported or voluntarily disposed of in a manner approved by the Department of Agriculture and Water Resources.

Please note: Inspection and quarantine certificates and stamps with the CIQ logo and current security features issued prior to **21 August 2018** will remain valid. During the coming weeks, certificates in both the old and the new format may be presented.

More information may be found at this link: [Offshore Methyl Bromide Treatment Providers List](#)
