

Brownes Dairy

Richard Ferguson

Please kindly note the below feedback:

- Micor is not user friendly, so anyone wanting to find out what requirements are, has to hunt around and rely on industry network contacts more so than DAFF.
- Foreign governments are not consistent in applying the regs, and often use different test methods which result in rejection of good stock.
- Once you are banned, it seems there is very little assistance from DAFF in getting the ban reversed, and product loss can be high.
- Would like to have more than one ticket available for these events so that we can include commercial and NPD business stakeholders

Many thanks!
