Hi s. 47F(1) and s. 47F(1),

Please see attached the Department's comments on the Supplement for the Browse to North West Shelf proposal (EPBC 2018/8319).

Please let me know if you have any questions or would like to discuss. If you could also follow up on whether the contacts have changed for Woodside, as I believe we were meant to have a discussion on s. 47F(1) changing roles.

Kind regards,

s. 22(1)(a)(ii)

Subject: EPBC 2018/8319 Proposed Browse Project

Good Morning

Please find below notification that Woodside is re-issuing an updated version of the Proposed Browse Project Supplement Report to the draft EIS for assessment. Updates have been made to address DAWE's comments on Revision 0 of the document.

Shortly after this e-mail, you will receive a secure sendfile link which will allow you to download the following documents which are submitted for assessment;

- Proposed Browse Project Supplement Report to draft EIS/ERD (No track changes) (BD0006RH000022 - Revision 1)
- Response to DAWE comments on DAWE comments on the Browse EIS Supplement

- This document provides a description of how Woodside has responded to each of DAWE's comments received on Revision 0 of the EIS/ERD Supplement.

Please note, Woodside has also submitted the following two documents in support of your assessment but should not be considered part of the formal EIS/ERD Supplement.

- Proposed Browse Project Supplement Report to draft EIS/ERD (Track changes enabled) (BD0006RH0000022 - Revision 1)
 - This version of the EIS/ERD is provided for transparency as to all changes that have been made on the draft EIS/ERD
- Minor amendments to the supplement register.
 - This informal register has been submitted as a record changes that have been made to the draft EIS/ERD as a result of something other than a comment from DAWE (e.g. EPA comment or typographical correction).

Thank you.

Previous actions:			
Number	Item Description	Action by	Status
1.3	Provide revised Response to Submissions and supplement by 30 October 2020 - Browse documentation - NWS documentation	Woodside	Browse: Completed NWS: In Progress
3.1	Provide PAP to Woodside and DWER for updating	DAWE	Completed
3.2	Update timeframes within PAP for provision to DAWE	DWER	Completed
3.3	Updated PAP signed by 3 December 2020	All parties	Completed

Notes:

- DAWE consider the Browse projects response to submission document was adequate. The parties noted that the outstanding NWS documents are required for DAWE to accept a 'Final EIS' for the purposes of our EPBC requirements.
- Woodside advised they are working towards providing DAWE and DWER with revised Response to Submissions (RtS) and Supplement for the NWS project in January 2021.
- Woodside discussed potentially looking into ways in which the Browse documentation could be amended to reflect NWS heritage requirements to allow continuation of assessment whilst NWS being finalized. The parties agreed that the assessment and approvals process for Browse and the NWS should remain in parallel, but there is benefit in using this period (whilst finalizing NWS) to work through other matters to support efficient processes when the statutory timeframes commence.
