ANZBC Achievements

2013

Unnecessary barriers removed for the trans-Tasman movement of cats and dogs.

Jointly developed Antifouling and in-water cleaning guidelines.

Implementation of Australian Fumigation Accreditation Scheme.

Collaboration on Plant biosecurity diagnostic and surveillance web-based bioinformatics toolkit.

NZ joins the Centre of Excellence for Biosecurity Risk Analysis.

2014

Foot and Mouth Disease Action Plan signed.

Real-time training for Foot and Mouth Disease in Nepal.

Systems recognition for bovine semen collection centres.

Development of the Bilateral Treatment Acrreditation Scheme.

Plant Health Quads¹ collaborative workling group on DNA barcodes established.

Collaboration on fruit fly simulation & response

2015

Performance of Veterinary Services selfevaluation. Evaluation of veterinary services of each Country.

Collaboration on fruit fly simulation & response

2017

Australia provides assistance with *Mycoplasma bovis* response.

International symposium on Xylella fastidiosa, in Brisbane.

Start of Brown Marmorated Stink Bug partnership.

Quadrilateral Scientific Collaboration in Marine Biosecurity.

Plant Health Quads¹ collaborative workling group on seed health established.

Plant Health Quads¹ collaborative workling group on manging regulatory issues arising from new diagnostic technologies established.

2018

Collaboration in canine influenza outbreaks.

Established best practice for Australia and New Zealand audit operations.

Trans-Tasman Biosecurity Risk Detection Technology Cooperation.

Modern Seamless Border Clearance – 3D x-ray project.

Establishment of the Offshore Brown Marmorated Stink Bug Treatment Providers Scheme.

Refresher training for both fumigation and compliance verification activities.

A joint verification visit to cut flower production areas, pack house/storage facilities and treatment facilities in India.

Collaboration on kiwifruit bacterial disease response.

Crowdsourced innovative marine biosecurity technology.

Created informal Biofouling Network.

2019

Information sharing on Foetal Bovine Serum.

Provision for Ornamental fish to undergo off-shore quarantine in Australia.

Collaborated in research and information sharing on marine biosecurity.

Progression of electronic data exchange for sanitary certification.

New Zealand fruit fly contingency protocols.

Coordinated approach to the review of the International Maritime Organisation biofouling guidelines.

Collaborated on horticulture innovation project on improving industry access to new genetics

Collaborated on research to improve *Xylella fastidiosa* diagnostics.

Collaboration on fruit fly simulation & response.

Harmonisation of BMSB conditions between Australia and NZ.

Joint work on a condition assessment guide for Brown Marmorated Stink Bug detected on cargo and vessels.
