Look out for hitchhiker pests in recently imported goods

Australian Government
**Department of Agriculture,
Fisheries and Forestry**

Hitchhiker pests present a huge threat to Australia. They can arrive here by 'hitching a ride' in imported goods and sea containers from overseas.

If you handle goods that have been recently imported into Australia, always keep an eye out for pests and other biosecurity risks.

This could include items such as:

- international mail or air freight
- imported goods in retail shops or warehouses
- newly purchased goods for your home.

If you see something unusual or unexpected, secure it and report it to us immediately by calling the **See. Secure. Report.** hotline on **1800 798 636**. You can also visit agriculture.gov.au/report

Any dead pests should also be reported to the hotline.

We all benefit from keeping these pests out of Australia.

Look out for...

Khapra beetle

Exotic invasive snails

Asian honeybees

Asian spongy moth

Exotic invasive ants
