

Australian Government
Department of Agriculture,
Fisheries and Forestry

Agricultural traceability and the integrity of animal health systems

Joanna Bunting
Assistant Secretary, Agricultural Traceability Branch
1 March 2023

Key Stakeholders

OUR TRACEABILITY JOURNEY

How far have we come together?

Draft National Agricultural Traceability Strategy

Draft Vision

- Relates to industry, governments and other agricultural supply chain participants
- Looking to have adopted connected, aligned and interoperable traceability systems along supply chains
- Be fit for purpose, efficient and dynamic in nature
- Sustainably accelerate Australian exports and enhance biosecurity and food safety and protect cultural intellectual property.

Australian Agricultural Traceability Alliance

Draft Implementation Plan
Session 2

27 FEBRUARY 2023

How is the Australian Government contributing?

Over \$100 million committed since 2020

National Strategy

Driving collaboration between industry and Australian governments to support interoperable agricultural traceability systems, co-design a National Agricultural Traceability Strategy, and showcase Australia's world-class traceability.

Credentials

Developing consistent credentials around sustainability and other value-added claims to grow global markets and bring economic benefit including to First Nations Australians

Innovation and Growth

Developing a trusted, data-led traceability ecosystem and delivering collaborative research projects to foster a robust, streamlined and responsive traceability regulatory framework.

Biosecurity and Trade Outcomes

Providing national leadership on livestock and other biosecurity traceability reforms to deliver the government's commitment

Supporting the implementation of mandatory eID for sheep and goats from 1 January 2025

Supporting industry transition

Industry and Governments Sheep and Goat Traceability Taskforce

National Livestock Identification System.

Future Agricultural Traceability

"The Whole is Greater than the Sum of its Parts" - Aristotle

"If you can't measure it, then you can't improve it"
Lord Kelvin, William Thomson, Peter Drucker
