PLANT BIOSECURITY POLICY MEMORANDUM 2002/29

GENERIC IMPORT RISK ANALYSIS – FRESH PINEAPPLE FRUIT

This Plant Biosecurity Policy Memorandum (PBPM) is to provide you with a copy of the Final generic Import Risk Analysis (IRA) Report on the importation of fresh pineapple fruit.

In response to import access requests from the Philippines, Thailand, Sri Lanka and the Solomon Islands, Biosecurity Australia has conducted a generic import risk analysis (IRA) on a proposal to import pineapples to Australia.

On the basis of the risk analysis the Executive Manager of Market Access and Biosecurity has determined that, consistent with Australia's quarantine policy, the importation of pineapples will be permitted subject to the application of phytosanitary requirements as specified in Section 9 of the Final IRA Report.

I enclose for your information a copy of the Final IRA Report. The Final IRA Report will also be available on the AFFA web site at <http://www.affa.gov.au/plantbiosecurity>, then click on 'Finalised Plant IRAs'. Hard copies of the appendices are also available on request from Plant Biosecurity's Technical and Administrative Services (contact details overleaf).

Biosecurity Australia has followed the process as outlined in the *Australian Quarantine and Inspection Service (AQIS) Import Risk Analysis Process Handbook*. Any stakeholder of the opinion that the process as outlined in the handbook has not been properly followed for this IRA may appeal the decision. Appeals should be sent by close of business 31 July 2002 to the Director of Animal and Plant Quarantine, who is the Secretary of the Department of Agriculture, Fisheries and Forestry, at the following address:
