

Approved Arrangement Site Biosecurity Risk Material Record

This form must be completed by an Accredited Person when bark, soil or animal/plant/insect contamination is found in imported containers and on timber packaging/dunnage. This form must be maintained at your Approved Arrangement (AA) site.

Container contaminants or notifiable contaminants (e.g. grain on container floor or live insects in the container) must be recorded per container (i.e. one row per container in the table below). Bark found on timber packaging/dunnage must be recorded per consignment (i.e. one row per consignment in the table below). Please tick all that apply.

| AA site name: | | | | State: | | | | | | AA site | AA site number: | | | | | |
|---------------|----------------------|-----------------|---------------------|---------|----------|------------------------|----------------|------------------|------|--------------------------|---|----|---|-----------------|-----------------|--|
| | | | | Contair | ier type | Container contaminants | | | | Timber packaging/dunnage | | | Notifiable contaminants (notify the department immediately) | | | |
| Date | Accredited Person | Entry number | Container number | FCL | LCL | Straw | Seed/ grain | Animal faeces | Soil | Bark | If bark is present, is timber marked with ISPM 15 stamp? (Please circle) | | Live insects or frass | Live animals | Dead animals | |
